

Summary

- ☒ **RUST KILL CR-550** is a liquid compound specially prepared to dissolve metal oxide layer without rusting while removing rust. It is a high-performance rust remover that is safer, more efficient and quickly removed than conventional inorganic acids (hydrochloric acid, sulfuric acid, nitric acid).

Characteristic

- ☒ The range of products is varied and is deoxygenated to the original color.
- ☒ It removes rust, carbon, pollutants and oxides quickly.
- ☒ There is little damage to the base material and it exerts the best effect even in fine grooves and cracks.
- ☒ Maximum effect when used at room temperature.
- ☒ It is easy to use various working methods such as dipping and spraying.

Application

- ☒ Removal of rust in repair and maintenance of automobiles, heavy equipment, agricultural machinery, etc.
- ☒ Rust removal of precision machinery parts, piping, storage tanks, railway car maintenance, and equipment when repairing various ships.
- ☒ Rust removal of industrial machine parts, tools, molds, bearings, etc.

Points to note when using

- ☒ When using the product, avoid contact with the skin if possible and wear protective equipment.
- ☒ When spraying, please use it lean against wind.
- ☒ Please clean your skin after using the product.
- ☒ Please read the Material Safety Data Sheet (MSDS) before use.

How to use

- ☒ Oil or grease that is contaminated with the target metal may interfere with penetration of the liquid, so remove it before working.
- ☒ It can use to be diluted 1 ~ 3 times with the original solution depending on the degree of rust generation and the operation speed.
- ☒ After use, please rinse with water and rust-proofing separately.
- ☒ It can be used by spraying, brushing, or dipping.

Packing

- ☒ 600gr/pe. can × 20ea/Box (including sprayer)
Remove the blue lock of the sprayer and use it.
After use, wash sprayer and keep separate.
If the sprayer is immersed in liquid for a long time, it will not work.
- ☒ 20kg/pe. pail
